Subject: Comments on the Draft Forestry Landslides Rationale
Attachments: Draft Rationale for LandslideProne Areas JC Cmts.docx

Hi Chris,

Thanks for providing me with an opportunity to review this document. Attached are my comments/edits for your consideration.

After I reviewed this document, thinking it was the issue paper, I realized it was the rationale. So my comments both provide some potential editorial changes/suggestions for the rationale and ideas on how to convert this rationale into an issue paper.

When considering my comments, do remember that this is not my area of expertise so if the comments/editorial changes don't make sense or I am suggesting adding information that is not needed for the targeted audience, then just ignore them.

Cheers,

Jayne
